AS TO USE OF SECOND GROWTH SUDAN GRASS

One Instance of Poisoning, But Not in the South—Well to Be Careful, However.

Second-growth Sudan grass has been fed as pasture to both cattle and hogs in Texas. The results were highly gratifying. But there are some places where it is feared cattle are poisoned when pasturing on Sudan grass.

An instance has come to the attention of the officials of the United States Department of Agriculture from the state of Washington. A man turned two milk cows in on some second-growth Sudan grass. In five or ten minutes after the cattle entered the field the owner found one of the cows dead. The other was quite sick, but recovered later.

C. V. Piper, authority on forage crops in this country, when asked about the danger from poisoning, stated that analysis of Sudan grass showed some prussic acid present.

"I feel that there is perhaps less danger from Sudan grass in the southern states than in those farther north. My own feeling is that it can be pastured with little danger, provided the growth has been normal. It is well to advise care in pasturing the grass."

Thrown From Buggy.

Florence Minor was thrown from her buggy Tuesday and severely but not seriously injured. She, in company with her mother, was driving on the Dixie Highway near Burrows Wells' home when the horse grew frightened at an approaching automobile, and dashed the buggy against a telephone pole. The shock threw Miss Minor out onto the pike and she sustained several bruises. Her mother, who was holding an infant, remained in the buggy and was unharmed.

To Build Two Farm Silos.

Lee Turner, owner of one of the largest farms in this county, is making preparations to build two large silos on his farm east of here, and material is being placed on the ground for the purpose. They will be of wood construction, but built under specifications endorsed by the County Agricultural Agent. Mr. Turner sees the advantage gained by feeding silage to stock and is preparing to that effect. A large number of Marion County farmers are now possessors of silos and more will fall in line, as the advantages become more apparent.

INSTALLED ELECTRIC EGG TESTING MACHINE.

Jasper, Tenn., Aug. 5.—The Farmers Supply Co., has installed an electric egg testing machine. The officials of the state food and drugs department, are waging war against bad eggs, and dealers or middlemen to avoid getting into trouble, are forced to be very particular as to the condition of the eggs they send to market. Hence, eggs are being very carefully examined, and some dealers use the old-fashioned candling system of holding an egg up before a light at night. More up-to-date merchants are installing the electric testing machine whereby eggs can be tested as they are received night or day and thus avoid losses from bad or defective eggs, which they otherwise incurred. It also enables them to give top market prices, which they could not before give, owing to the presence of these losses.

FOLEY KIDNEY PILLS FOR BACKACHE KIDNEYS AND BLADDER

These hats, worn by Miss Byrd, cost but 25 cents. It was made by girls of tomato clubs.

These hats and the ornamental flowers thereon were made entirely of corn shucks, will stand all kinds of weather without injury, and are practically indestructible. One of the hats was done in red and green, the colors of the tomato club, with the entire expense of making as follows: dye, 5 cents; lining, 10 cents; mat for band, 10 cents; total, 25 cents. This is the uniform hat worn by the Bradley county girls in their work. The other hat which was done in black and trimmed in red shuck roses and without frame cost 15 cents.

During the farmers' convention Melissa Byrd, the county agent in home economics, wore one of the hats made by the girls of tomato clubs of Bradley county.

OFFER POULTRY CLUB PRIZES.

One hundred dollars in prizes to the boys and girls that raise the best chickens, a silver loving cup to the boy or girl showing the best display of chickens at the fair, and a silver loving cup to the poultry club making the best exhibit at the county fair this fall are to be awarded in Weakley county as the result of the gifts of George M. Brooks & Company, produce dealers, The Weakley County Bank, and the Dresden Bank. There are two hundred boys and girls in Weakley county interested in poultry club work.

FROM THE SOIL COMES THE CROP

To Make Money the Soil, First of All, Must Be a Producer

MAINTAIN SOIL FERTILITY

Facts Known About the Soil Should Be Used in Making the Farm Give Greater Returns—How Vegetable and Mineral Matter Act Together.

(By C. E. Allred, Division of Extension, University of Tennessee.)

The soil that can not grow good crops in abundance is the soil that loses the farmer money. How to get the soil up to its highest yielding power is a question one must answer to be successful in his work.

The power of the soil to produce depends on many factors. Some are well known and reliable as guides. Others are not so well known. We do know that the soil is composed of many finely-divided particles of rock. These mineral parts of the soil afford much of the plant food that is needed for the growth of the plants. Closely associated with the mineral elements of the soil are the parts of decayed and decaying vegetable matter. Peat and leaf mold are examples. For the soil to be a high producer, the mineral parts of the soil and the vegetable parts must be in the proper proportion. This proportion can be told by one working in the field by the way the soil responds to the farm implements and by the way the crops yield at the close of the season.

The vegetable matter that is needed in all soils can be placed there by growing green crops and plowing them under, by returning the straw of grain crops to the land, and by feeding the crops to live stock and hauling the manure back to the land. As the plants and the manure decay in the soil, certain chemicals are produced. These chemicals act upon the rock particles in the soil much like vinegar acts when put on limestone. This action frees the mineral plant foods that the plants need, and we see the crops respond with greater growth and yields.

BRADLEY COUNTY TOMATO CLUB MEMBERS UTILIZE CORN SHUCKS TO ADVANTAGE—HATS COLORED ARTISTICALLY.

Hats made in Bradley county of corn shucks are attracting much attention. Officials of the United States Department of Agriculture have complimented the girls of the tomato clubs by asking them for the hats to be used in exhibits in other states. The hats were on exhibition at the East Tennessee Farmers' Convention, where the government officials saw them.

WHITWELL MAN USES "HERBMYSTIC" WITH ASTOUNDING RESULTS

Gains 37 Pounds and Begins to Eat Anything after Taking Just Seven Doses—Cured of Stomach Trouble After 21 Years Suffering.

Mr. John T. Christain, of Whitwell, Marion county, Tenn., says he is preaching the gospel of good health, after using four bottles of "Herbmystic," Nature's Greatest Tonic, the superior preparation. Here's the startling facts in his case: "I am glad to have the opportunity to explain my case to you. I have had what the doctors called stomach trouble for 21 years. I have tried all kinds of medicine that was recommended for indigestion. I have spent hundreds of dollars for the different remedies, but did not get any relief. First of June I had to stop eating anything except a little soup, every time I would eat anything I would have smothering spells, shortness of breath, palpitation of the heart and I got so I couldn't walk to my work, which was a mile away, had to rest five and six times. I got so weak I had about given up all hope of ever getting well. Two of the best doctors in town did all they could for me, but no relief. I had not eaten a bite of bread in four months. On Oct. 16th I bought a bottle of "Herbmystic." I weighed 120 pounds. After taking seven doses, I ate bread, and began to eat anything I wanted to eat and it did not hurt me. I did not

smother, shortness of breath all gone, can walk to my work in forty minutes, where I took two hours to go. Nov. 16th, one month later, I weighed 157 pounds. I gained 37 lbs. in one month. Today, Dec. 21, I weigh 147 lbs. I am feeling better than I have felt in 21 years. I have used four bottles of "Herbmystic" and I can't praise this medicine high enough for what it has done for me. It has cured me of Stomach trouble, Liver, and Kidney disease. I am as well as I ever was and I don't feel any effects of stomach trouble any more. Many thanks to you for this great remedy. I am preaching the gospel of good health telling the people what "Herbmystic" has done for me, will do the same for them. I wish every person in the world that is sick would use one bottle and be convinced that they can be cured. The druggist can not keep it. They got in a supply a few weeks ago and it's all gone."

This is one of many statements that we have received from grateful people, certifying to the wonderful curative powers of this superior preparation "Herbmystic" is sold in Sequatchie Valley by Evans & Pope, Whitwell, J. W. Simpson & Son, Jasper, Jno. J. Ingle, South Pittsburg.
